

COMPETENCE MEETS PRECISION

# CONTROL CABINET CONSTRUCTION 360°

We offer customized switchgear  
of the highest quality –  
for over 40 years.

## COMPETENCE

We **manufacture individual and modular cabinets, control consoles and terminal and control boxes for a wide range of indoor and outdoor applications** including power and voltage distribution, drive technology, control technology and I&C technology.

## CONFORM TO STANDARDS

Upon request, we can manufacture your enclosures with a **CE marking** and include conformity assessment procedures in accordance with EN 60204-1, EN 61439, the EMC Directive, and other relevant standards. With **UL 508A** and **CSA C22.2 No. 14** approvals for use in the United States and Canada, we reliably meet international standards. As an option, the **customer can certify** our switch cabinet production.

## PASSION

Enclosure construction is our passion, and it has been **for over 40 years**. We are manufacturing around **4,000 linear meters of control cabinets per year** in a production area of more than **10,000 square meters**.

## CLIENT FOCUS

At F.EE, you can order **custom control cabinets** according to your specifications, including special enclosures and colors.

## KNOW-HOW

Thanks to our many years of working with customers from a **variety of sectors**, we have extensive expertise in mechanical and plant engineering, automotive and supplier industries, energy and building technology, and food, pharmaceutical, and construction industries.

## RELIABILITY

As experienced automation experts, we guarantee reliable **delivery in approximately 8 to 12 weeks** after material and plan approval, provided that standard components are available.

## FLEXIBILITY

At F.EE, we focus on your needs, whether you take on the **engineering and provision of materials** or use our **all-inclusive carefree package**. Our engineering department has over 30 specialists with decades of expertise in planning and hardware engineering. To maximize efficiency, we also offer supplier consignment warehouses.

## QUALITY & SUSTAINABILITY

F.EE stands for the **highest standards** in switch cabinet construction – thanks to its state of the art testing bay, functional simulation, optional fieldbus testing, and device preparameterization.

Our quality is certified to **DIN EN ISO 9001** and our commitment to the environment is certified to **DIN EN ISO 14001**. As a member of the “**Umweltpakt Bayern**”, we take responsibility today and tomorrow.
